**What does the fund invest in?**

The fund seeks to replicate, to the extent possible, the performance of the S&P/TSX Equal Weight Industrials Index (the "Index"), net of expenses. The investment strategy of the fund is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index. The Index includes securities whose businesses are derived from industrial activities. Each constituent security is allocated a fixed weight rather than a market capitalization weight.

**How has the fund performed?**

This section tells you how the fund has performed over the past 3 years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

It's important to note that this doesn't tell you how the fund will perform in the future as past performance may not be repeated. Also, your actual after-tax return will depend on your personal tax situation.

**Average return**

As at December 31, 2015, a person who invested \$1,000 in the fund 3 years ago now has \$1,261. This works out to an annual compound return of 7.7%.

**Year-by-year returns**

The chart shows how the fund has performed in each of the past 3 completed calendar years. The fund dropped in value in 2 of 3 years.

### How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### Risk rating

BMO Asset Management Inc. has rated the volatility of this fund as medium.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "Risk Factors" section of the fund's prospectus.

### No guarantees

Like most exchange traded funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.
