How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

BMO Investments Inc. has rated the volatility of this fund as **medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What are the risks of investing in a mutual fund?" section of the fund's simplified prospectus.

**No guarantees**

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

**How has the fund performed?**

This section tells you how Advisor Series (Hedged) units of the fund have performed over the past 3 calendar years. Returns are after expenses have been deducted. These expenses reduce the series' returns.

**Year-by-year returns**

This chart shows how Advisor Series (Hedged) of the fund has performed in each of the past 3 years. The series dropped in value in 1 of the 3 years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for Advisor Series (Hedged) units of the fund in a 3-month period over the past 3 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
<b>Best return</b>	11.4%	January 31, 2023	Your investment would rise to \$1,114
<b>Worst return</b>	-11.7%	June 30, 2022	Your investment would drop to \$883

**Average return**

The annual compound return of Advisor Series (Hedged) of the fund since inception was 6.8% as of April 30, 2024. If you had invested \$1,000 in this series since inception, your investment would now be worth \$1,292.

**Who is this fund for?**

**Consider this fund if:**

- you are seeking long-term capital growth from your investment
- you are comfortable with a highly concentrated portfolio of global equity investments
- you are comfortable with medium investment risk (i.e., you are willing to accept fluctuations in the market value of your investment).

Advisor Series (Hedged) securities are for investors who want to gain exposure to global investments but wish to minimize exposure to fluctuations in foreign currencies relative to the Canadian dollar.

**A word about tax**

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

**How much does it cost?**

The following tables show the fees and expenses you could pay to buy, own and sell Advisor Series (Hedged) units of the fund. The fees and expenses, including any commissions, can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

**1. Sales charges**

There is only one sales charge option. The DSC option has been discontinued for new purchases, except for switches from existing securities acquired on the DSC option.

## 2. Fund expenses

You don't pay these expenses directly. They affect you because they reduce the returns of this series of the fund.

As of September 30, 2023, the Advisor Series (Hedged) expenses of the fund were 2.04% of its value. This equals \$20 for every \$1,000 invested.
